

On-Call Escalation Matrix - Harbor Data Lake

Document ID: NWB-RB-403 | Version 5.1 | Last reviewed 2026-08-20 | Owner: Data Platform Engineering

1. Severity Definitions

Severity	Definition
Sev-1	Sentinel TM scoring not run, or run on incomplete data, for more than 1 business day; or a data integrity issue affecting alerts across multiple feeds
Sev-2	A single feed missed its hard cutoff, or same-day alerts were missed or materially wrong
Sev-3	A feed breached its SLA but is expected before the hard cutoff; no alert impact
Sev-4	Cosmetic or non-urgent issues (dashboards, non-critical reports)

2. Escalation Path

Level	Contact	When to engage	Response target
Tier 1	Data Engineering on-call (PagerDuty service hdl-primary)	All severities	Acknowledge within 15 minutes
Tier 2	Priya Raman, Data Engineering Lead	Sev-2 unresolved after 30 minutes; Sev-1 immediately	30 minutes
Tier 3	Tom Kessler, Director, Data Platform	Sev-1 unresolved after 2 hours	1 hour
Business	Elena Brooks, FCC Operations Manager	Every Sev-2 and Sev-1, within 1 hour of declaration	Informed
Compliance	Dana Whitfield, BSA/AML Officer	Sev-1, or any alerts missed for more than 1 business day	Informed in writing

3. Upstream Contacts

Feed	Team	On-call channel
WIRE_DAILY	Payments Operations	PagerDuty: payments-ops-oncall
ACH_DAILY	Treasury Operations	PagerDuty: treasury-ops-oncall
CASH_TELLER	Retail Branch Systems	Slack: #branch-systems-support
CARD_AUTH	Card Services	PagerDuty: card-services-oncall
CUST_MASTER	Core Banking	PagerDuty: core-banking-oncall

4. Communication

All incidents are coordinated in Slack channel #hdl-incidents. Status updates are posted every 30 minutes for Sev-1 and every hour for Sev-2 until resolved.
