

# Postmortem: Late Wire Feed Due to Expired SWIFT Gateway Certificate

Postmortem ID: PM-2026-0419 | Incident date 2026-04-19 | Severity: Sev-2 | Feed: WIRE\_DAILY

## Summary

WIRE\_DAILY arrived at 07:40 ET, after its 05:30 SLA and 06:15 hard cutoff, because a TLS certificate on the Payments Operations SWIFT gateway expired overnight. Same-day wire alerts were delayed but none were lost.

## Timeline (US Eastern)

| Time  | Event                                                               |
|-------|---------------------------------------------------------------------|
| 05:30 | SLA breached; Sev-3 declared; payments-ops-oncall paged.            |
| 06:15 | Hard cutoff missed; upgraded to Sev-2; hold_flag set on WIRE_DAILY. |
| 06:50 | Priya Raman engaged (Sev-2 unresolved after 30 minutes).            |
| 07:05 | Elena Brooks (FCC Operations Manager) notified.                     |
| 07:40 | Payments Operations renews certificate; file lands.                 |
| 08:25 | File loaded using NWB-RB-401 steps 4-8; reconciliation clean.       |
| 11:30 | Off-cycle Sentinel scoring complete; 64 wire alerts generated.      |

## Impact

Wire alerts for the day were delayed by about 4.5 hours. No lookback was required because off-cycle scoring completed the same business day.

## Root Cause

An expiring certificate on the upstream SWIFT gateway was not monitored by Payments Operations.

## Resolution

Payments Operations renewed the certificate. The file was processed and scored off-cycle per NWB-RB-402 section 3.

## Runbook Adherence

**Followed.** All NWB-RB-402 hard cutoff steps and NWB-RB-401 steps 4-8 were completed; FCC Operations was notified within 1 hour.

## Action Items

| # | Action                                                                          | Owner               | Status |
|---|---------------------------------------------------------------------------------|---------------------|--------|
| 1 | Payments Operations to add certificate expiry monitoring (30/14/7-day warnings) | Payments Operations | Done   |
| 2 | Add WIRE_DAILY arrival prediction alert at 05:00 ET                             | Data Platform Eng   | Done   |
